securlyMDM

Simplified Apple Device Management

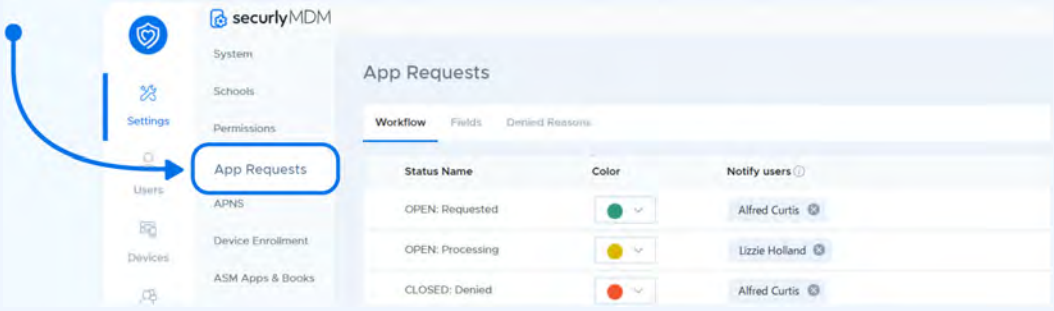

Managing hundreds—or even thousands—of Apple devices across a school or district can quickly become overwhelming for school IT teams. Whether it's pushing out app updates, configuring device settings, or ensuring student data privacy, the complexity increases as device fleets grow. An effective Mobile Device Management (MDM) system is essential for simplifying these tasks, ensuring schools can deploy, manage, and secure iPads and MacBooks (and other Apple devices) with minimal effort.

Securly MDM is designed specifically to meet these challenges. By simplifying and automating time-consuming processes and providing an easy-to-use interface, Securly MDM enables schools to manage their Apple devices more efficiently. With its focus on empowering teachers and integrating seamlessly with classroom tools, it offers a practical, affordable solution for any school or district.

With Securly MDM, you can

- **Effortlessly manage iPads and other Apple devices from a single dashboard, ensuring devices are always secure and up-to-date.**
- **Empower teachers with simple tools to freeze student screens, control which apps students can use during class, and maintain a distraction-free learning environment.**
- **Streamline app requests and approvals, allowing teachers to request deployment of the resources they want to use in their classrooms while reducing IT workloads.**

Features and Benefits

Effortless Device Management for IT Teams

Securly MDM offers centralized management of iPads and MacBooks, allowing IT teams to easily deploy apps, enforce security policies, and configure devices from a single dashboard.

Teacher-Centric Tools for Classroom Control

Teachers can control student devices by freezing screens, locking students into specific apps or websites, and customizing home screen layouts for a distraction-free classroom.

- **List Web Links:** Teachers can easily create, organize, and share website links with specific groups of students or devices for quick access.
- **Distribute Content:** Teachers can automatically distribute files to student devices, with auto-expiration to keep devices updated and clutter-free (iOS only).
- **Lock Sites and Apps:** Teachers can lock student devices to specific apps or websites during lessons, ensuring students stay focused.
- **Freeze Student Screens:** Teachers can freeze student screens with a custom message to capture attention and release individual students or the entire class when needed.
- **Customize App Screens:** Teachers can drag-and-drop to arrange apps on student home screens, including choosing custom wallpapers for different classrooms or activities.

Self-Service App Installation

Students can download pre-approved apps from a self-service list, giving them access to necessary tools while maintaining school control over app choices.

Centralize on a single platform to simply management

securly classroom — Teacher-friendly classroom management software for Chrome, PC, and macOS devices built to work alongside MDM.

securly filter — The K-12 web filter that goes beyond just blocking sites. Get edtech analytics, educationally appropriate AI, and more built in.

securly home — Give parents/caregivers more control when devices go home and opportunities to get involved in their kids' learning

Effortless Apple Device Management for Every Classroom

With Securly MDM, you can streamline Apple device management and empower your teachers with simple, powerful teaching tools. Ensure IT processes are optimized, teachers can focus on teaching, and students can focus on learning.
